Experiential Astrology

The focus for the day will be on Jupiter and its role in our birth chart. Esoteric astrology views Jupiter as an indicator of the knowledge we were born with and need to put into practice. It also is a clue to the nature of our beliefs and the philosophy on life that will most suit us. A representation of your Birth Chart will be set up on the floor into which you can step and experience separately the parts of which you are made. Using the Birth Chart in this way can increase self-knowledge and experiences gained through this process can lead to new levels of awareness, and is often healing. Experiential Astrology is a valuable tool that can be used directly to enhance the quality of our lives. It can help us overcome personal challenges, and support us in finding appropriate and beneficial uses for our talents and abilities. We will work as a group and individually, looking at what Jupiter means for us and how we can benefit from the present influence of Jupiter.

Jupiter

Every 12 yrs Jupiter which rules among other things knowledge, philosophy and belief, travels through Pisces the sign that governs the intuitive and psychic world. We will look at how each of us can use Jupiter as it is in our birth chart to make the most of the present presence of Jupiter in Pisces to tune into and trust in our intuition. Jung's work on synchronicity is relevant to this area of astrology.

What do I need?

You will need a birth chart in order to see how Jupiter influences you specifically rather than generally. Your chart will be prepared in advance for you when you book. You do not need a prior knowledge of astrology.
